Warning: FAN fault detected. Collect information by Server information collection tool and contact your sales representative.

Warning: If the temperature rises any higher, it will affect the proper operation of the system. Check that the air inlet is not clogged and the air conditioner is running.

Warning: It is considered a device fault when any fan condition is not working. Take the necessary actions and report to the maintenance representative.

Warning: If the temperature rises any higher, it will affect the proper operation of the system. Check that the air inlet is not clogged and the air conditioner is running.

Warning: iLO account shutdown. This is the event which occurred between this system start-up and the last system stop or system shutdown.

Warning: Storage System Fan Failure (Fan %1, Status: Critical). This is the event which occurred between this system start-up and the last system stop or system shutdown.

Warning: External Chassis Fan Failure (Chassis %1, Fan %2, Location %3). This is the event which occurred between this system start-up and the last system stop or system shutdown.

Warning: Storage System Fan Failure (Fan %1, Status: Warning). This is the event which occurred between this system start-up and the last system stop or system shutdown.

Warning: It is considered a device fault when any fan condition is not working. Take the necessary actions and report to the maintenance representative.

Warning: System Overheating (Temperature Sensor %1, Location %2, Temperature %3). This is the event which occurred between this system start-up and the last system stop or system shutdown.

Warning: External Chassis Fan Failure (Chassis %1, Fan %2, Location %3). This is the event which occurred between this system start-up and the last system stop or system shutdown.

Warning: Fan Failure (Fan %1, Status: Warning). This is the event which occurred between this system start-up and the last system stop or system shutdown.

Warning: Fan Failure (Fan %1, Status: Critical). This is the event which occurred between this system start-up and the last system stop or system shutdown.

Warning: System Overheating (Temperature Sensor %1, Location %2, Temperature %3). This is the event which occurred between this system start-up and the last system stop or system shutdown.

Warning: Fan Failure (Fan %1, Status: Warning). This is the event which occurred between this system start-up and the last system stop or system shutdown.

Warning: Fan Failure (Fan %1, Status: Critical). This is the event which occurred between this system start-up and the last system stop or system shutdown.

Warning: Fan Failure (Fan %1, Status: Warning). This is the event which occurred between this system start-up and the last system stop or system shutdown.

Fatal: NVDIMM Error detected. Collect information by Server information collection tool and contact your sales representative.

Uncorrectable Memory Error - Processor %1, DIMM %2 (SN:%3-%4-%5-%6). This NVDIMM will not be available to the server because of a permanent memory initialization or uncorrectable error. If the same error occurs on a future reboot in the same processor, the DIMM will be marked offline (0x374) and future backups are not possible. Data from last successful backup is intact, but data modified after the last successful backup is lost.

Controller Error - Processor %1, DIMM %2 (Serial no. %3-%4-%5-%6). NVDIMM could not be armed by the NVDIMM controller FW and future backups are not possible. Data on NVDIMM may have been disabled. Data on NVDIMM will not use the NVDIMM. Data from last successful backup is intact, but data modified after the last successful backup is lost.

Controller Error - Processor %1, DIMM %2 (SN:%3-%4-%5-%6). NVDIMM could not be Sanitized by the NVDIMM controller FW and future backups are not possible. Data on NVDIMM will not use the NVDIMM. Data from last successful backup is intact, but data modified after the last successful backup is lost.

Warning: An uncorrectable memory error occurred. The OS will not use the NVDIMM. Data from last successful backup is intact, but data modified after the last successful backup is lost.

Recovery not be determined.

</tbody>
</table>

**Steps to Resolve:**

1. Update the controller to the latest firmware.
2. If the issue persists, replace the controller.
3. Collect information by Server information collection tool and contact your sales representative.

**Additional Notes:**

- If more configuration changes since the last system boot, one or more configuration settings may be used from the last system boot. One or more configuration settings may be lost.
- If any configuration changes have been made after the last system boot, the system from booting. -System description:

### Memory Health Error

Detected. Collect information by Server information collection tool and contact your sales representative.

### PCIe Slot Error

Detected. Collect information by Server information collection tool and contact your sales representative.

### FlexibleLOM Error

Detected. Collect information by Server information collection tool and contact your sales representative.

### Power Supply Error

Detected. Collect information by Server information collection tool and contact your sales representative.

### Recovery

Critical error and may no longer be resilient. Collect information by Server information collection tool and contact your sales representative.

### Alert

Critical error and may no longer be resilient. Collect information by Server information collection tool and contact your sales representative.

### Fatal

Fatal: HPE Persistent Memory Error Detected. Collect information by Server information collection tool and contact your sales representative.

### Warning

Warning: HPE Persistent Memory is low or less. Collect information by Server information collection tool and contact your sales representative.

### Fatal

Fatal: Intel Optane Memory Error Detected. Collect information by Server information collection tool and contact your sales representative.

### Warning

Warning: Intel Optane Memory is approaching the end of its useful life. Collect information by Server information collection tool and contact your sales representative.

### Critical

Critical: Memory Module has experienced an issue and is no longer resilient. Collect information by Server information collection tool and contact your sales representative.

### Critical

Critical: Processor %1 DIMM %2 - The Intel Optane Persistent Memory has exceeded the current limit. Power Supply output will be disabled. Collect information by Server information collection tool and contact your sales representative.

### Critical

Critical: Processor %1 DIMM %2 - The Intel Optane Persistent Memory is leveling. Collect information by Server information collection tool and contact your sales representative.

### Critical

Critical: Processor %1 DIMM %2 - The Intel Optane Persistent Memory is leveling. Collect information by Server information collection tool and contact your sales representative.

### Critical

Critical: Memory Module is approaching the end of its useful life. Collect information by Server information collection tool and contact your sales representative.

### Warning

Warning: FlexibleLOM Error Detected. Collect information by Server information collection tool and contact your sales representative.

### Warning

Warning: PCI Slot Error Detected. Collect information by Server information collection tool and contact your sales representative.

### Warning

Warning: PCI Slot Error Detected. Collect information by Server information collection tool and contact your sales representative.

### Warning

Warning: PCIe Slot Error Detected. Collect information by Server information collection tool and contact your sales representative.

### File System Free Space

- **Normal**: Free space is sufficient.
- **Warning**: Free space is low, but not critical.
- **Fatal**: Free space is critically low.

### Page File Usage

- **Recovered**: Page file usage has returned to normal.
- **Warning**: Page file usage is high, but not critical.
- **Error**: Page file usage is critically high.

### Virtual Memory Usage

- **Warning**: Virtual memory usage is high, but not critical.
- **Error**: Virtual memory usage is critically high.

### Physical Memory Usage

- **Warning**: Physical memory usage is high, but not critical.
- **Error**: Physical memory usage is critically high.

### Trap Name

- **ESMFSService**: Trap for Service failures.
- **ESMMemoryUsage**: Trap for Memory usage failures.
- **ESMFSService**: Trap for Service failures.
- **ESMMemoryUsage**: Trap for Memory usage failures.

### SNMP Trap OID

- **1.3.6.1.4.1.119.2.2.4.4.18.3.1**: OID for Memory usage traps.
- **1.3.6.1.4.1.119.2.2.4.4.18.3.1**: OID for Memory usage traps.
