Source Name
It is displayed on "SOURCE" of the AlertViewer of NEC ESMPRO Manager.
Event ID (Hex digit)
The Event ID is a hexadecima number to identified for every event.
Error Type
The classification of the event notified is expressed. There are three kinds, it is "Information", " Warning" and "Error".
Event ID
The event ID is the event ID set as each event (decimal number). It is displayed on "Event ID" of the AlertViewer of NEC ESMPRO Manager.
Type
It is displayed on "Type" of the AlertViewer of NEC ESMPRO Manager.
Trap Name
It is displayed on "trapname" of the AlertViewer of NEC ESMPRO Manager.
KeyWord
When the special word is appeared in syslog, and it's message will be send
Message
It is displayed on "message" of the AlertViewer of NEC ESMPRO Manager.
Deal Meathod
It is displayed on "Deal Meathod" of the AlertViewer of NEC ESMPRO Manager.
Recover Action
It is processing to carry out after NEC ESMPRO Agent worked to report it.
Manager Report
When a display is "ON", Reporting is possibly to send NEC ESMPRO Manager .
Express Report (Level)
When Express Report is on and Level are 0-3, or 8, and the Express Report.

○	The alert is send
×	The alert is not send

Syslog Event list of Syslog monitoring

Source Name<SRC:>: ALERTMANAGER
When error occurred in a report file, it is a message to register.

Event ID (Hex digit)	Error Type	Event ID	Type	Trap Name	KeyWord	Message	Deal Meathod	Recover Action	Manager Report	Express Report (Level)	SNMP Trap OID (Enterprise ID.Specific ID)	NEC ESMPRO Agent Version 4.6.0-1 ~
80000001	Warning	1	AM	AM FILE ERROR	AM FILE ERROR	AM FILE ERROR. Temporary file has been broken.	Please report to the maintenance member.	NONE	ON	OFF	.1.3.6.1.4.1.119.2.2.4.4.18.3.1	○

Syslog Event list of ft server monitoring

Source Name<SRC:>: FTREPORT
* About a report test of "FtReport"
As for the event of source name "FtReport", a report is performed than syslog monitor service (/opt/nec/esmpro_sa/bin/ESMamvmain) and ftreport monitor service (/opt/nec/esmpro_sa/bin/ESMftreport).
If there is log to fall under source name "FtReport" in a syslog by ftreport monitor service start completion from OS start time, syslog monitor service performs a report (monitor). ftreport monitor service performs a report (monitor) after it.
Because it has been already it with a monitor state by the ftreport monitor service from syslog monitor service by the timing to perform a test report, It do not report it experimentally.
In that purpose, ft server utility (/opt/nec/esmpro_sa/bin/ESMftcutil) of the CPU module perform [stop] to [start], and it is necessary let change the state of the real module, and to confirm it.

Event ID (Hex digit)	Error Type	Event ID	Type	Trap Name	KeyWord	Message<MSG:>	Deal Meathod	Recover Action	Manager Report	Express Report (Level)	SNMP Trap OID (Enterprise ID.Specific ID)	NEC ESMPRO Agent Version 4.6.0-1 ~
