# Steps to update firmware by Starter Pack DVD

This document includes notice for using starter Pack DVD to update Firmware. Please see the following steps to update firmware directly by Starter Pack DVD without Windows and Linux OS environment.

(1) Disable the secure booting.

Run System Utilities, and then proceed to Secure Boot Settings in System Configuration > BIOS/Platform Configuration (RBSU) > Server Security.

- (2) When Windows(R) BitLocker(TM) function is set to "Enabled", install the System ROM after making the function "Disabled". Then make the function "Enabled" after install and reboot of the system. If you install the system ROM without making the function "Disabled", you may need the recovery password when you boot the system.
- (3) Power off and power on the server or restart the server by pressing <Ctrl>+<Alt>+<Delete> keys.

The POST will start as the following screen.

(4) Press <F11> key during the POST.

## The following Boot Menu is shown.

The list of Boot Menu will be changed depending on the system environment.

(5) Choose the DVD drive set in step (2) on the One-Time Boot Menu.

The Starter Pack DVD will start and the following menu is shown.

(6) Choose **Interactive Firmware Update** by pressing <down> key and press <Enter> key.

- If no key is pressed within 10 seconds, be careful another update process will start automatically.
- Customers using Express5800/R110j-1 be sure to select "Interactive Firmware Update" if System ROM v 2.00 (05/15/2019) is applied.

Wait for a while until the following screen appears.

iLO		iLO Integrated Remote Console - Server: WIN-SISDTG5SRG5   iLO: BMCCN77310	36. <b>– – ×</b>

/arnings	/Alerts						

The blue bar means that the firmware will be installed at step (12).

(12) Search for "Online ROM Flash Component for Linux - iLO5" and "Language Pack - Japanese", and make sure status of the selected component.

If iLO5 is not selected, click "Select" or "Force" to change it to "Selected" or "Forced".

Do not change the selective state of other firmware by this step.

\* When downgrading the firmware, set to "Selected" or "Forced" manually.

(13) Scroll the window if necessary, and then click **Deploy** on the lower left of the screen. "Step 3 Deployment" will start.

Wait for a while until "Deployment completed" message appears on the screen like the below.

- (16) If the system ROM has been updated to the latest version after restarting and completing the POST (Power on Self Test), steps (17) to (21) are not necessary. Please proceed to step (22). To confirm the latest version, please refer to the release notes for the target system under "System ROM related" in the "Release Notes" section on the web page that publishes the Starter Pack. To confirm the current system ROM version, please follow these steps: (i) Log in to the iLO Web interface.
  - (ii) Confirm the "System ROM" item on the screen "Information > Overview > Server".

In another way

- (i) During POST, press <F9>key to start System Utilities.
- (ii) Confirm the "System ROM" item.System Information > Summary > System ROM

(17) If the system ROM has not been updated to the latest version after reboot, please proceed to step (3) to (11) again and proceed to the "Step 2 Review" screen.

(22) Enable the secure booting if necessary.

(23) Enable the BitLocker(TM) if necessary.

The procedure is complete after the system restarts.

When Internal Slim DVD-ROM drive [N8151-137] or Internal DVD-Super Multi Drive [N8151-138] is used, the Starter Pack DVD can not be ejected after the system restarts. For details, see Troubleshooting [1. Starter Pack DVD cannot eject from the DVD drive].

#### Troubleshooting

## 1. Starter Pack DVD cannot eject from the DVD drive

If the DVD eject button does not work after restarting the server, please see the following steps to eject the DVD.

(1) Power off/on the server or restart the server by pressing <Ctrl> + <Alt> + <Delete> keys.

The POST will start as the following screen.

(2) Press <F10> key during POST.

The following screen will appear.

10	iLO Integrated Remote Console - Server: WIN-SISDTG5SRG5   iLC	: BMCCN7731036.	-	n x
Power Switch Virtual Driv	is Keyboard			
1024 x 768	OST Cude: 003E	184 U F Q	🔒 AES	•••

(3) Choose **Provisioning**. If no key is pressed within 10 seconds, the Provisioning will start automatically.

After a while, the following screen will appear.

iLO Integrated Remote Console - Server: WIN-5V0NJV8KE10   iLO: BMCCN7731036.										
Power Switch Virtual Drives Keyboard										
NEC Express5800/R120	h-1M		0 A	E 📕	?	i	ט			
EXPRESSBUILDER										
OS INST.	ALL	PERFORM MAIN	TENANCE							
1024 x 768		144 III	¥ •			🔒 AES				

- (4) To eject the DVD, press the DVD eject button on the DVD drive.
- (5) To exit the EXPRESSBUILDER, click the power icon on the upper right and choose **Power off** or **Reboot system**.

The procedure is completed.

2. Installation stopped with "Your connection is not secure"

If the installation cannot proceed with the following error, follow the steps below.

- (1) Click the "Advanced" on the screen.
- (2) Click the "Add Exception..." on the screen.
- (3) On the pop-upped "Add Security Exception" screen, click the "Confirm Security Exception".

The procedure is completed.
